PROFESSIONAL SUMMARY

Software Engineer with 1 year of experience in Java microservices, building enterprise-grade automation frameworks and full-stack applications.. Adept at bridging the gap between QA rigor and product engineering and experienced in building scalable REST APIs, distributed data systems, and real-time data workflows.

WORK EXPERIENCE

Cognizant Technology Solutions

Software Engineer

Aug 2025 – Present

Chennai, Tamil Nadu

- **Integrated Generative AI** into development, boosting script velocity by **~20%** and reclaiming **~8 hours/week** for architectural tasks
- **Engineered** E2E automation for microservice reliability for a high-concurrency financial data platform
- **Optimized** backend integrity via complex **SQL validation**, resolving bottlenecks and ensuring data accuracy for scalable DB structures
- **Architected** API suites to validate **REST microservice** performance and enforce contract compliance via scripted assertions
- **Collaborated** in **Agile/Scrum** sprints, participating in sprint planning and retrospectives to accelerate iterative delivery

PROJECTS & INTERNSHIP

Cognizant Technology Solutions

Software Engineering Intern

Mar 2025 – Jul 2025

- **Owned end-to-end development** of full-stack apps (FlexField) using **Spring Boot**, focusing on MVC architecture and scalability
- **Developed** modular backend services integrated with **PostgreSQL** to handle high-concurrency user requests efficiently
- **Spearheaded** front-end logic design, ensuring seamless integration between RESTful APIs and interactive UI components

FlexField: Full-Stack Sports Logistics Platform

Spring Boot, React, AWS

- **Architected** a full-stack engine using **Spring Boot/React.js** for real-time turf booking and complex relational data management
- **Engineered** production-grade RESTful microservices using Spring Boot, handling concurrent user sessions and transactional data flows
- **Implemented Spring Security** and JWT for role-based access control, securing sensitive user registration and transaction data
- **Deployed and Managed** production environments on **AWS EC2** supporting high availability and efficient data persistence

SkyCast: Web Weather Application

JavaScript (ES6+), OpenWeather API, CSS3

- **Engineered** a high-performance async dashboard via Fetch API to coordinate parallel weather and AQI JSON data requests
- **Implemented** Geolocation API for automated coordinate retrieval with robust error-boundary handling for permissions and timeouts
- **Developed** a DOM-based UI state system to toggle visibility and update condition-specific asset mapping dynamically in real-time
- **Designed** a Flexbox UI using React.js with color-coded feedback to visualize five distinct AQI hazard levels for enhanced user accessibility

EDUCATION

Galgotias University, Greater Noida

B.Tech in Computer Science & Engineering

2021 – 2025

GPA: 8.0/10.0

City Montessori School, Lucknow

12th Grade (Intermediate - ISC)

2020 – 2021

Percentage: 93.25%

City Montessori School, Lucknow

10th Grade (High School - ICSE)

2018 – 2019

Percentage: 94.80%

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL, HTML5, CSS3, Python

Frameworks: Spring Boot, Spring Security, React.js, Node.js, MySQL, PostgreSQL

Tools/Cloud/Core: OOPs, AWS (EC2), Postman, Selenium, Cypress, Git, Agile, Scrum, Spring MVC, Maven, BDD

Concepts: Distributed Systems, Event-Driven Architecture, Data Pipelines, High-Concurrency Systems

ACHIEVEMENTS & CERTIFICATIONS

- **Java Certification:** Completed the Java Developer assessment on HackerRank, validating proficiency in advanced Java concepts
- **Front-End Specialization:** Earned Front-End Web Development certification from Udemy, specializing in React.js architecture
- **Academic Excellence:** Awarded for consistent high performance with 94.80% in High School and 93.25% in Intermediate
